

EnGenius Technologies Launches Family of Wireless ProAV Solutions Through Capitol Sales

Leading Distributor of Home Theater, Integrated Home Systems, and Commercial AV Products Will Be First to Offer EnGenius' High-Performance Easy-to-Use Wi-Fi Solutions for Residential and Commercial Deployments

COSTA MESA, Calif. – February 23, 2016 – [EnGenius Technologies](#), Inc., a leading provider of high-performance, versatile [networking](#) and [telecommunications](#) solutions for [businesses](#) and [consumers](#), and Capitol, the leading consumer electronics distribution source for residential systems specialists, retailers, PRO AV contractors, and premium incentive resellers today announced the launch of a family of wireless AV solutions designed to provide the high-performance WiFi connectivity required to support high-bandwidth applications such as Smart Home technology, video streaming, and BYOD initiatives in homes and businesses.

The new EnGenius family of Wireless AV Solutions enables simplified planning and installation of Wi-Fi infrastructures in residential or commercial environments. The solutions combine high-powered, high-performance dual-band 11ac access points to deliver the speeds to support high-bandwidth applications with Gigabit PoE adapters or PoE+ Gigabit switches to enable easy, convenient placement of the access points on ceilings, walls or desktops to maximize range and performance. The EnGenius ceiling-mounted access points feature a low profile, smoke detector design enabling them to blend into surrounding décor. The desktop version features removable antennas to allow the use of higher-gain antennas to increase wireless coverage in challenging environments.

The family of EnGenius Wireless ProAV Solutions includes:

- **PROAV17501 Residential Wireless AV Solution** – Includes two desktop or wall-mountable dual-band 11ac access points to deliver speeds up to 1,750 Mbps in homes up to 3,000 square feet;

- **PROAV17502 Residential Wireless AV Solution** – Includes two low-profile, ceiling-mount dual-band 11ac access points to deliver speeds up to 1,750 Mbps in homes up to 3,000 square feet;
- **PROAV17503 Luxury Wireless AV Solution** – Includes three low-profile, ceiling-mount dual-band 11ac access points and one 8-port Gigabit PoE+ Layer 2 switch to provide wireless speeds up to 1,750 Mbps in homes up to 7,500 square feet;
- **PROAV17504 Commercial Wireless AV Solution** – Includes six low-profile, ceiling-mount dual-band 11ac access points and one 24-port Gigabit PoE+ Layer 2 switch to provide wireless speeds up to 1,750 Mbps in homes or businesses up to 18,000 square feet;
- **PROAVMGT1200 Managed Wireless ProAV Solution** – Includes three low-profile, ceiling-mount dual-band 11ac access points and one 8-port Gigabit PoE+ Controller switch to provide a completely managed and expandable WiFi solution that delivers wireless speeds up to 1,200 Mbps in environments up to 5,000 square feet.

“As technologies in the IoT and Smart Home industries continue to evolve, the demands that they place on the network continue to increase making it more important than ever to have a reliable, high-performance wireless infrastructure as the backbone to enable these exciting new applications,” said Curt Hayes, President at Capitol Sales. “These new wireless AV solutions make it simple for resellers, contractors or system integrators to plan and deploy a fast, reliable Wi-Fi infrastructure that will allow their customers to receive the maximum performance from their high-bandwidth applications.”

“We’re excited to partner with Capitol to roll out our new family of Wireless AV Solutions,” explained Bryan Slayman, Product Line Manager at EnGenius. “As a leading distributor of technology products and solutions in the residential sector, Capitol provides us with an outstanding opportunity to expand our reach into the growing audience of ProAV installers that are experiencing the value, performance and ease-of-use that our products and solutions bring to the market segment.”
